Overall Perspective of the Primary Healthcare Performance Measures Program:

The Case of Primary Health Care in Israel

Rabinowitz G., Raskin-Segal A., Porath A., Weizmann R

Measures by Domain Matrix

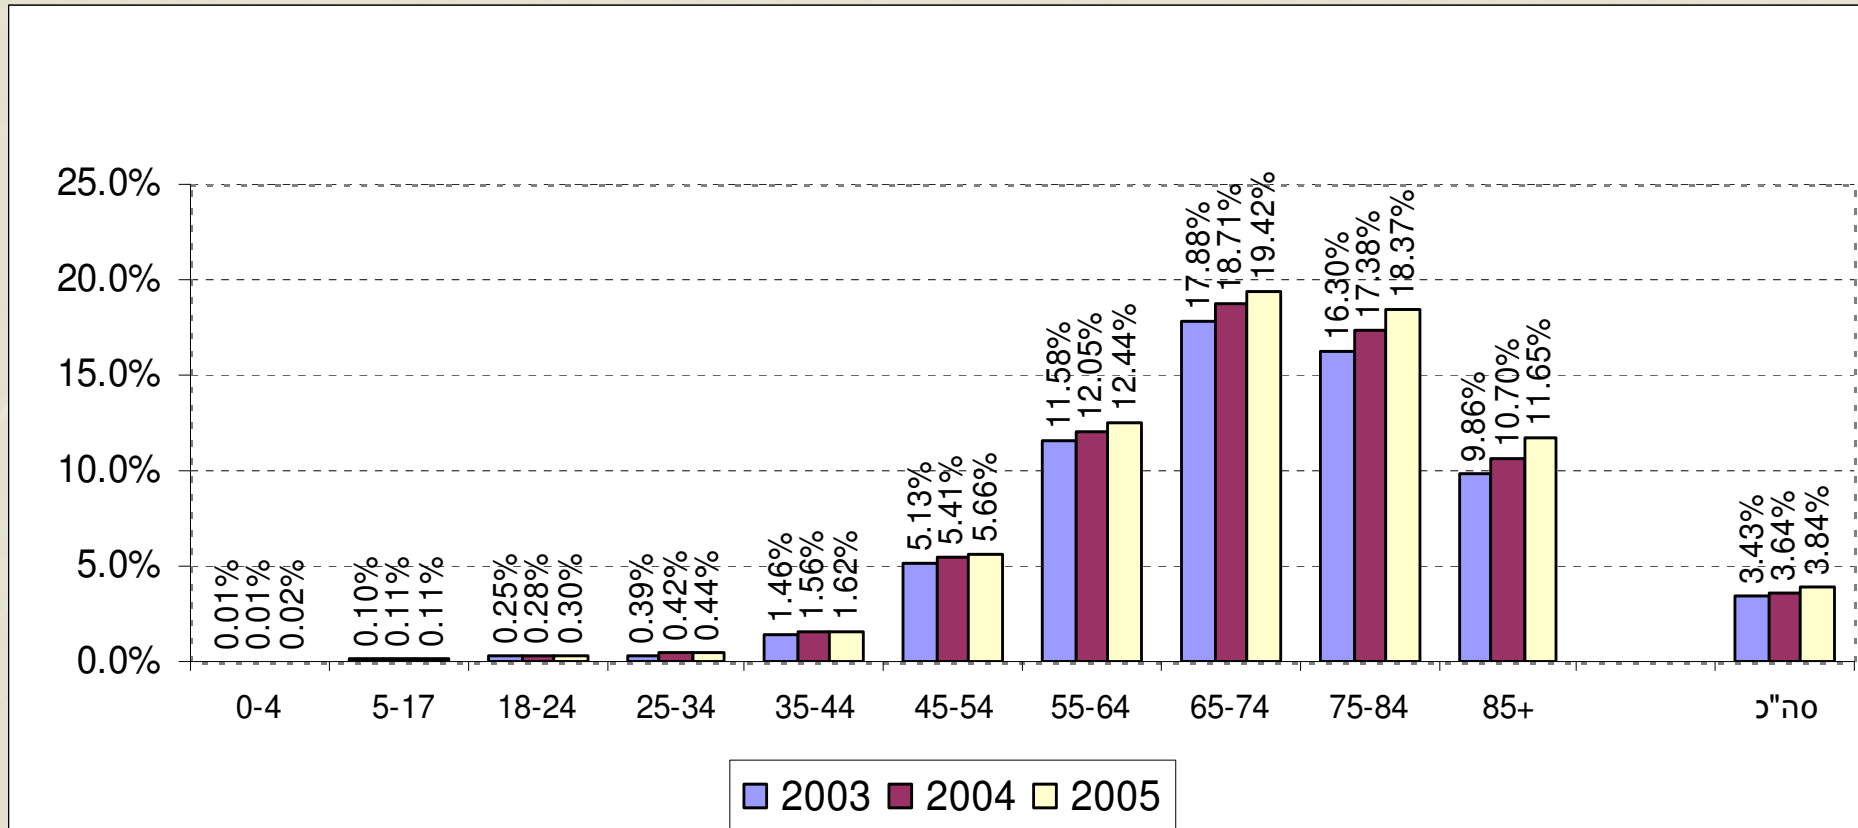

Domain	Control	Treatment	Prevention	Morbidity	Reporting Status	All
Flu vaccination			1		2005	1
Asthma		1	1	1	2005	3
Cardio-vascular	2	2	4		2005	10
					New- 2006	12
Diabetes	5	3	4	1	2005	13
					New- 2006	6
Cancer Screening			1		2005	1
					New- 2006	2
All	7	6	11	2	2005	26
					New- 2006	20
	8	10	24	2	Overall	46

Results – 2006 report

Diabetes Domain

Diabetes – Morbidity

Prevalence of diabetes

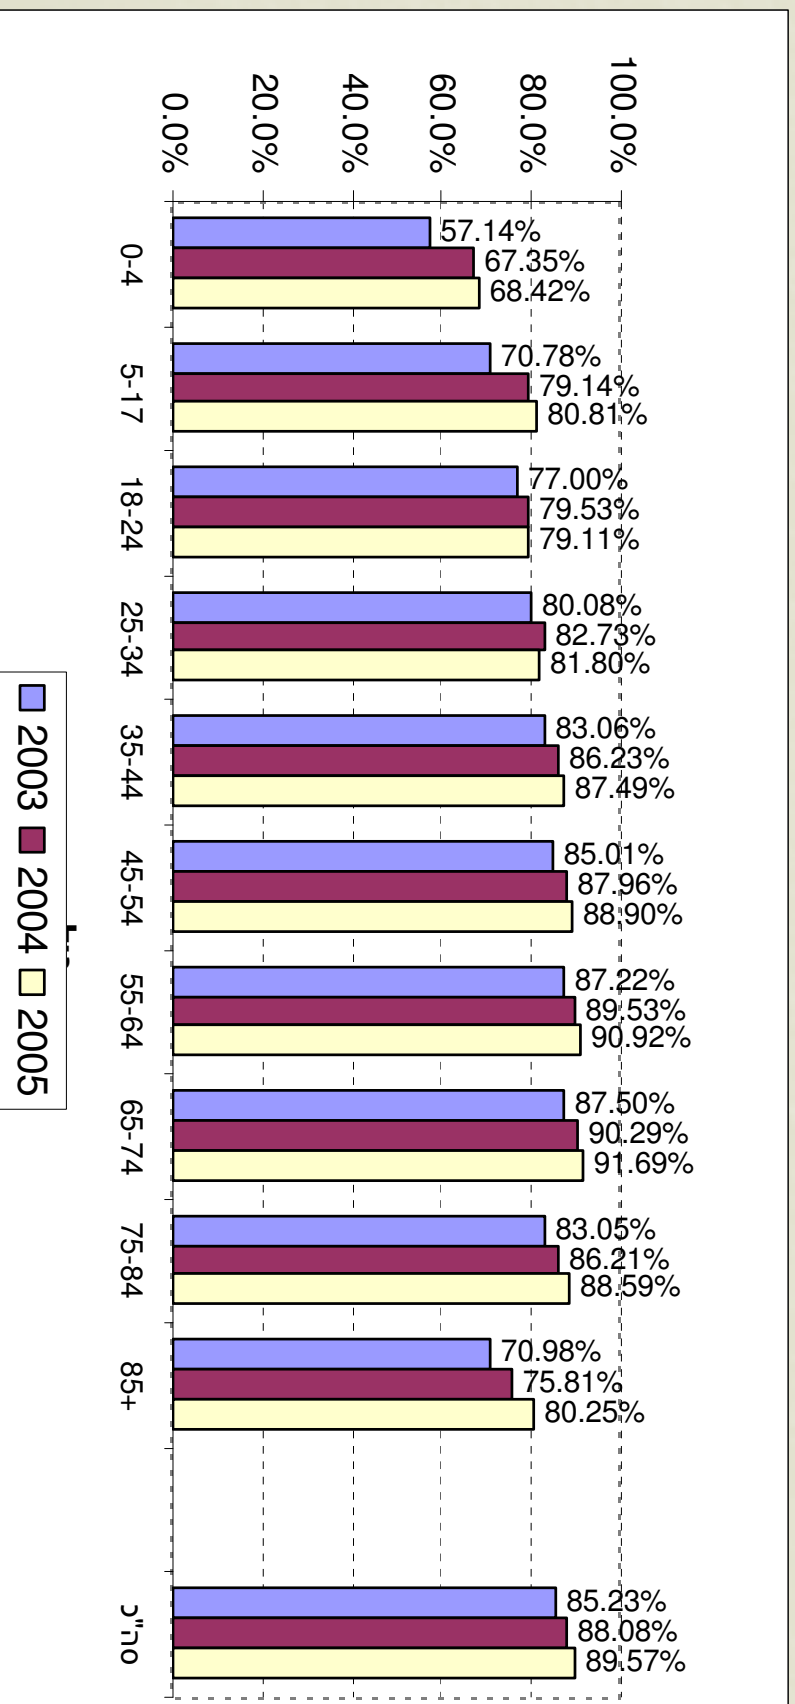

253,233 Diabetes Patients [of 6,603,116 citizens]

Purchasing Medications in 2005

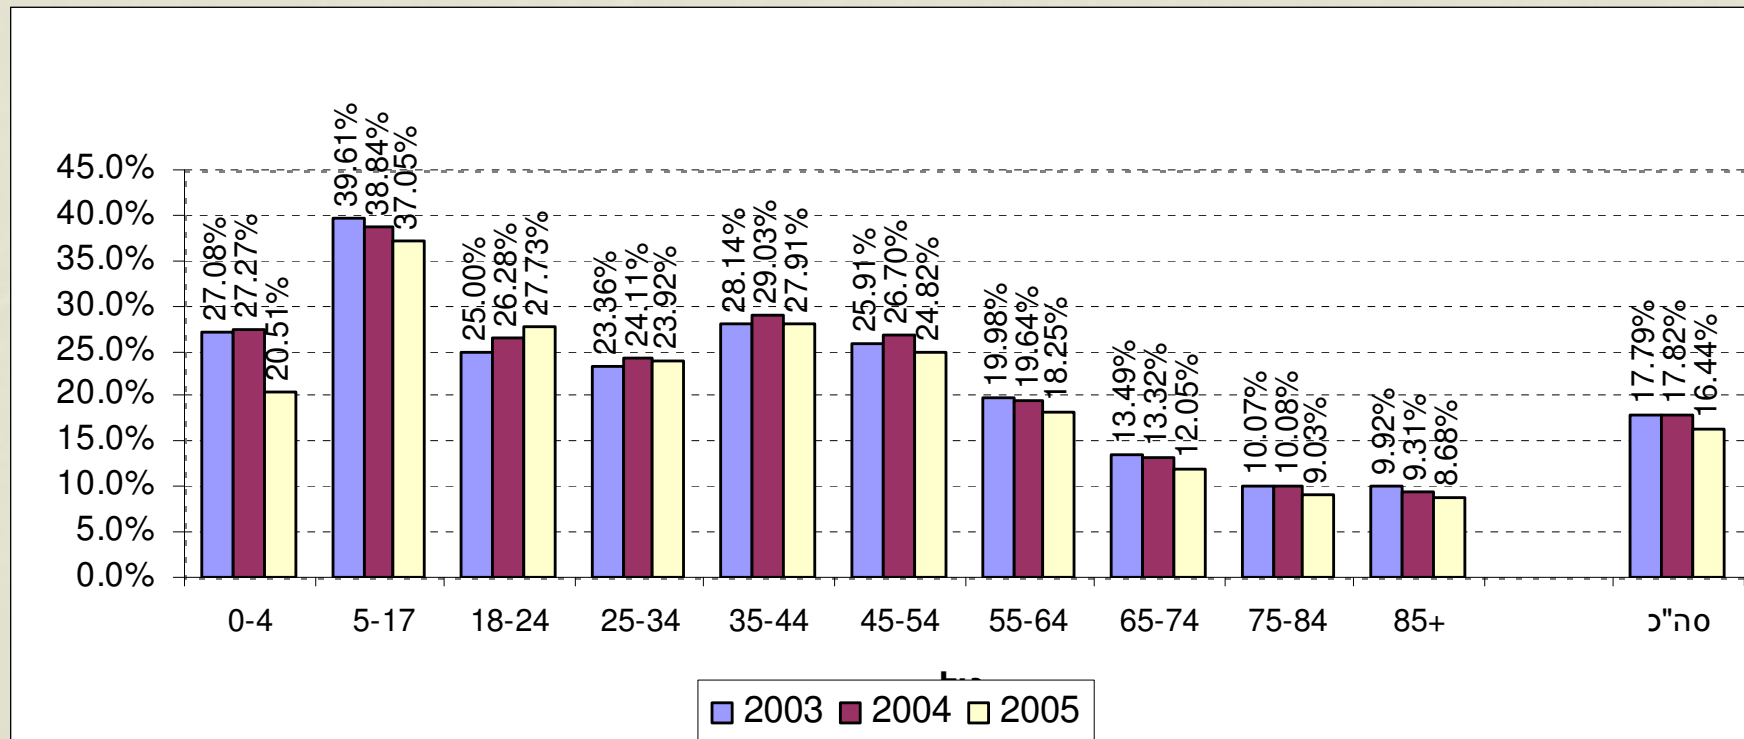

Diabetes – Prevention / Process

Rate of testing HbA1c

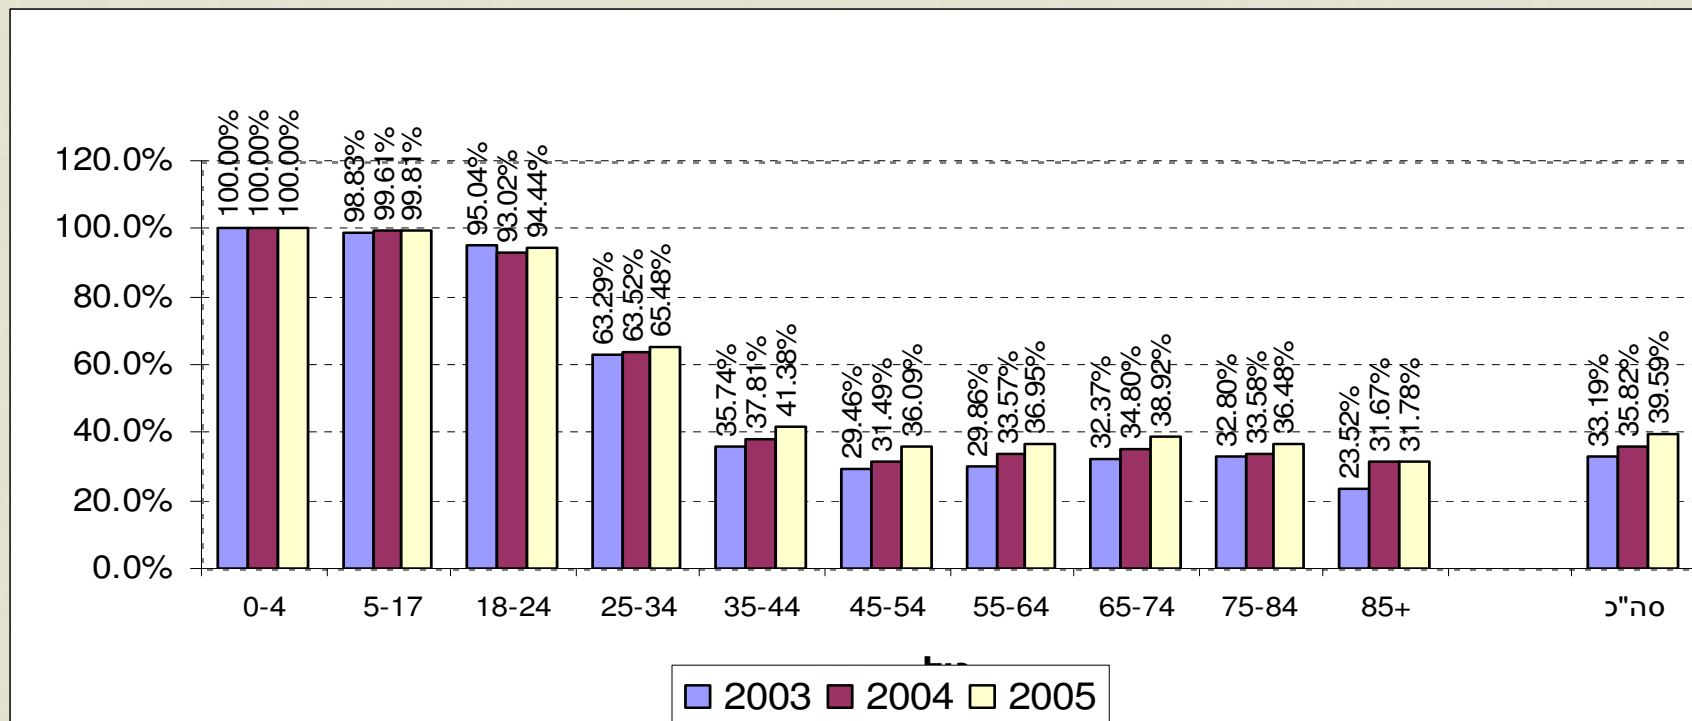

Diabetes - Control / Outcome

Poorly balanced patients (HbA1C > 9%)

Diabetes – Treatment / process

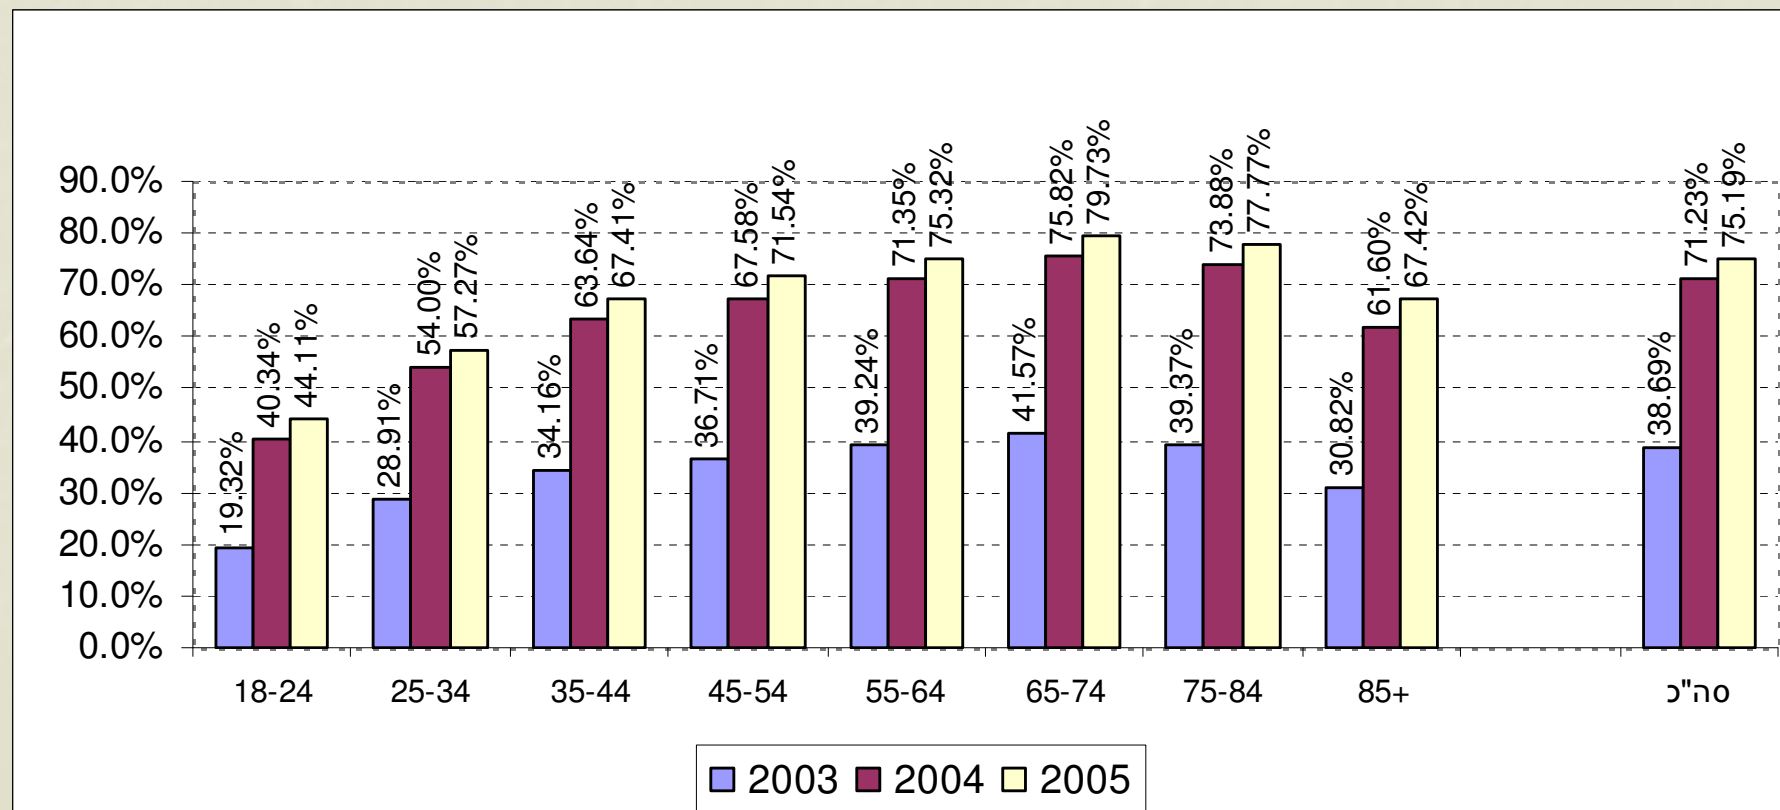

Poorly balanced patients (HbA1C > 9%) treated with insulin

סה"כ 46,351 [18.3%] מטופלים באינסולין ב- 2005

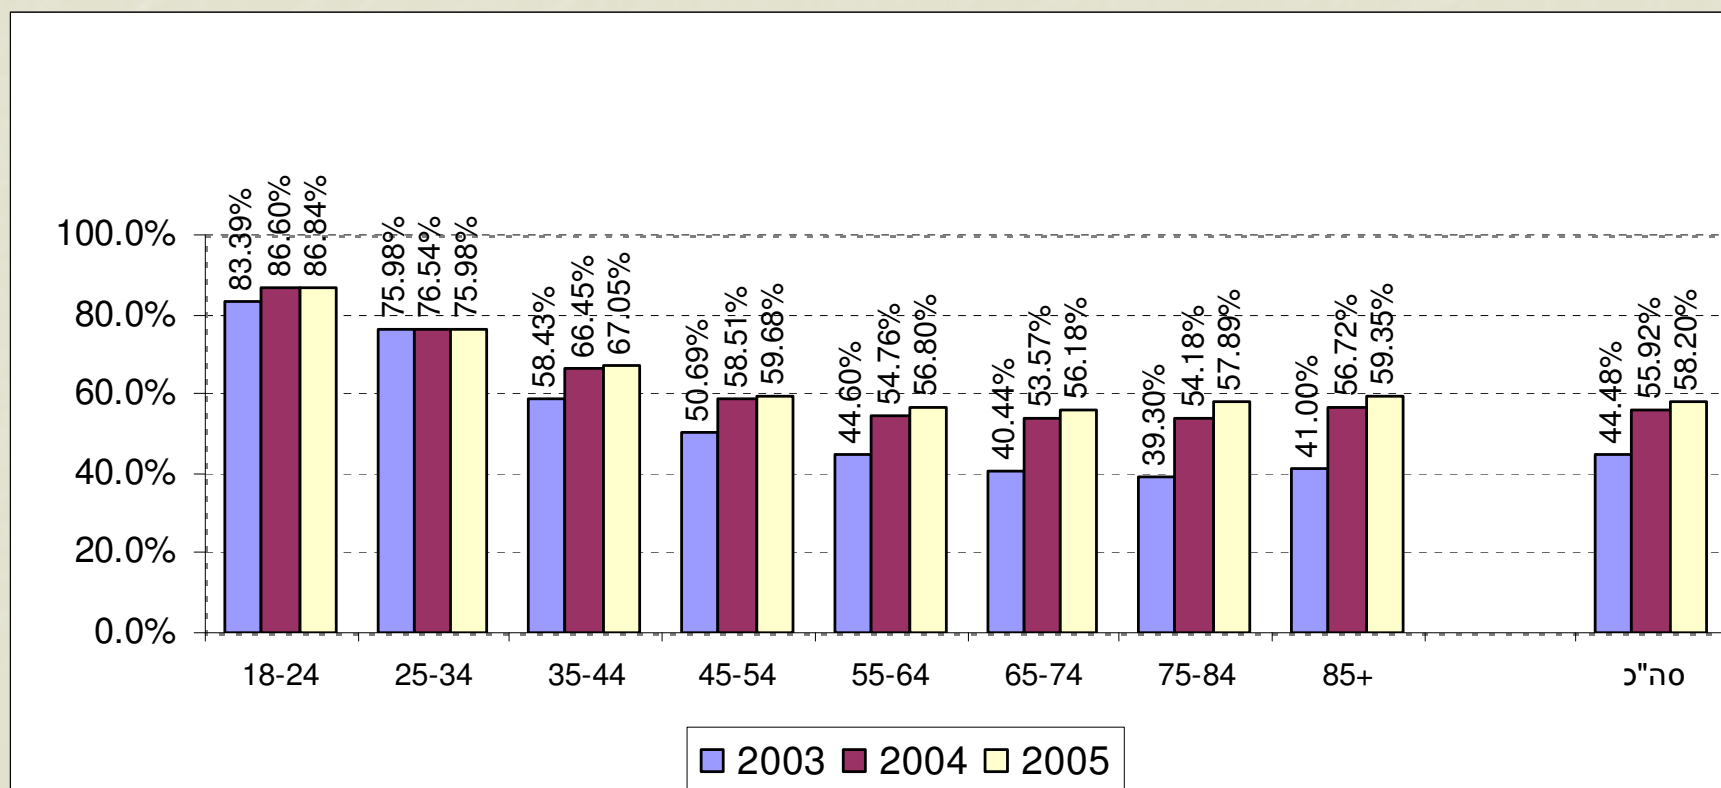

Diabetes – Prevention / Process

Rate of blood pressure readings

Diabetes - Control state / Outcome

Well balanced Blood Pressure in diabetic patients (80/130)

Diabetes measures

Measure Type	Description
Morbidity	Prevalence of diabetes
Prevention	Rate of testing HbA1c
	Rate of testing LDL
	Rate of eye examinations
	Rate of albumin
	Rate of flu vaccination
	Rate of blood pressure readings
Treatment	Well balanced patients (HbA1C < 7%) treated with insulin
	Diabetic patients (7% < HbA1C < 9%) treated with insulin
	Poorly balanced patients (HbA1C > 9%) treated with insulin
Control state	Well balanced diabetic patients (HbA1C < 7%)
	Poorly balanced patients (HbA1C > 9%)
	Diabetic patients with LDL < 130 mg/dl
	Diabetic patients with LDL < 100 mg/dl
